

**MINERX**

**Powered by Technology · Perfected Through Vision**

A Groundbreaking Bitcoin Mining Project Empowered by Quantum Superconducting and AI-Driven Smart Computing

# BTC → Digital Gold

- January 3, 2009, the very first Bitcoin is mined.

The ONLY Global Currency NOT Controlled by ANY State or Government.

- Bitcoin breaks government monopolies
- Bitcoin is recognized by 119 countries globally.
- Soon, 20+% of the world's GDP will be stored using blockchain technology.

The ONLY International Asset that Grows Against Global Economic Trends and Withstands Risks.

- Bitcoin has become an important choice for investors to hedge economic risks
- The rise of Bitcoin inscription and Layer 2 (L2) sectors has introduced new empowerment solutions for Bitcoin miners, leading to the emergence of multiple promising players.

The ONLY Underlying Asset that Defines the Value Consensus in the Trillion-Dollar Cryptocurrency World.

- Bitcoin became the core reference for trillions of crypto assets around the world
- Binance, the largest centralized exchange (CEX) globally, has over 100 million monthly active users, with its platform token reaching new all-time highs

# Media Spotlight: Institutional and Public Adoption of Bitcoin

## Institutional Trust in Bitcoin Continues to Surge

## Global Economic Powerhouses Take Notice

## Global Celebrities Embrace Bitcoin and Blockchain Technology

# BTC Experiences a 4-Year (48 Month Cycle)

# Bitcoin is now the Seventh Largest Asset Class, Globally.

According to CompaniesMarketCap, Bitcoin's peak market value in 2024 has risen to \$1.398 trillion, surpassing silver (\$1.380 trillion) to become the seventh largest asset globally by market capitalization. Since the start of 2024, the halving event has garnered unprecedented global attention, driving sustained momentum in the blockchain industry.

# Right Arms Project 3.0

- Founded in 2018, Right Arms is a World-Class Gaming Community Guild.
- Dedicated to Innovation and Development in the Blockchain Field.
- Today, Right Arms is leading the Global Web 3.0 Revolution
- Combining Technological Innovation, building Decentralized Communities through a DAO.
- The Latest Global Trends, Promoting the Development of Frontier Technology Fields such as GameFi & NFTS, Creating an Open Decentralized Financial Ecosystem, and Leading these Industry Trends.

## Researching the Trends

Right Arms actively embraces the latest global trends and continues to lead the market with key positions in technology areas such as GameFi, NFT and Web 3.0.

## DAO Community

Right Arms builds a Decentralized DAO Community that promotes Freedom, Openness, Equality & Enabling Global Users to Connect and Co-Create Value.

## Lead these Industry Trends

In the world of Web 3.0 and Open Finance, Right Arms plays a Leading Role, becoming a Leader in the Industry Circuit through Technological Innovation and Industry Foresight.

# Trev

## Business Development Director of AOG & MinerX

- Master of Business Administration (MBA) Certificate from Sun Yat-Sen University in Guangzhou, China.
- 12 years of experience in East Asia, specializing in Sales, Business Development, and Fundraising.
- Involved with Multiple Blockchain Projects since 2017, including EDS, Moxy.io, and CandyClub Online Gaming, TheLastMonarchy.io, Logion.Network & GoingApe
- Assisted with the fundraise of \$6M SGD Series A Round for a Singaporean Blockchain Startup focused on ESG & Carbon Credits.
- Assisted in raising €100M for a European Real Estate Investment Fund.
- Helped a Hong Kong Wealth Management Company with their \$1M USD Equity Fundraise.
- Contributed to AOG Global Sales efforts across several countries, including Vietnam, China, and South Korea.
- Played a key role in the AOG NFT roll-out, achieving a sell-out of 10,000 Rare NFTs at \$5,000 USD each.
- Successfully fundraised \$20M USD for the AOG RainbowSwap DEX Liquidity Pool launch.
- Facilitated a total capital injection of \$130M USD for the AOG Ecosystem.
- Assisted with the AOG~MinerX strategic acquisition negotiation process.

# Daniel Grenon

**Global Ambassador & Strategic Advisor to  
Right Arms Project 3.0 Global Community**

- Over 17 years of dominating the network marketing industry, consistently ranking among the elite top earners, setting the gold standard for success.
- Built a colossal network of 1.2 million people across the globe, showcasing unparalleled leadership and influence.
- Versatile leader with experience as CEO, GMD, CMO, and Ambassador, offering valuable insights from both corporate and field perspectives.
- Active network spanning 40 countries, thriving in Asia for the past six years, bridging diverse markets and cultures.
- Dedicated to creating innovative, easy-to-duplicate systems that empower countless individuals towards financial independence.

# Prof.Dr.Jeffrey (DSJ)

## Co-Founder of Right Arms Project 3.0

- Finance Tech PHD from Harvard University
- Over 10+ Years of Network Marketing Experience, Since 2014
- AIQ Limited Shareholder, Listed on The London Stock Exchange Mainboard
- UniSwap Exchange Asia-Pacific Main Distributor
- UniSwap Community Master Node Holder, Representing Over 30+% of ETH Assets in the UniSwap Liquidity Pool
- Leading & Managing more than 7 Million Community Members, Across 18 Countries
- BAYC NFT Asia Main Distributor & Asia's Largest Collector
- Blockchain Advisor to Hon. Scott Morrison, former Australian Prime Minister
- Co-Founded Right Arms Project 3.0 in 2018, Expanded to 15+ Countries, to-date
- Incubated Over 100,000 Community Leaders to Achieve Million Dollar Lifestyles, since 2014

# ISAAC (TC)

**Global Strategic Officer & Marketing Director of Right Arms Project 3.0**

- Community Operator, Managed Millions of Members, including: Polygon's Matic Token
- RightArm's Asia-Pacific Community Ambassador
- Mentor Blockchain Education Earliest Minter of ORDI Token
- Malaysia's Top 50 Young Chinese Leaders Technopreneur
- Outstanding Young Entrepreneur at the Malaysia International Prestige Brand Awards
- Joined the RAP3.0 community since 2019, Managed International Communities
- Incubated STEP N, Phantabear, Sandbox, Gala, and Matic communities

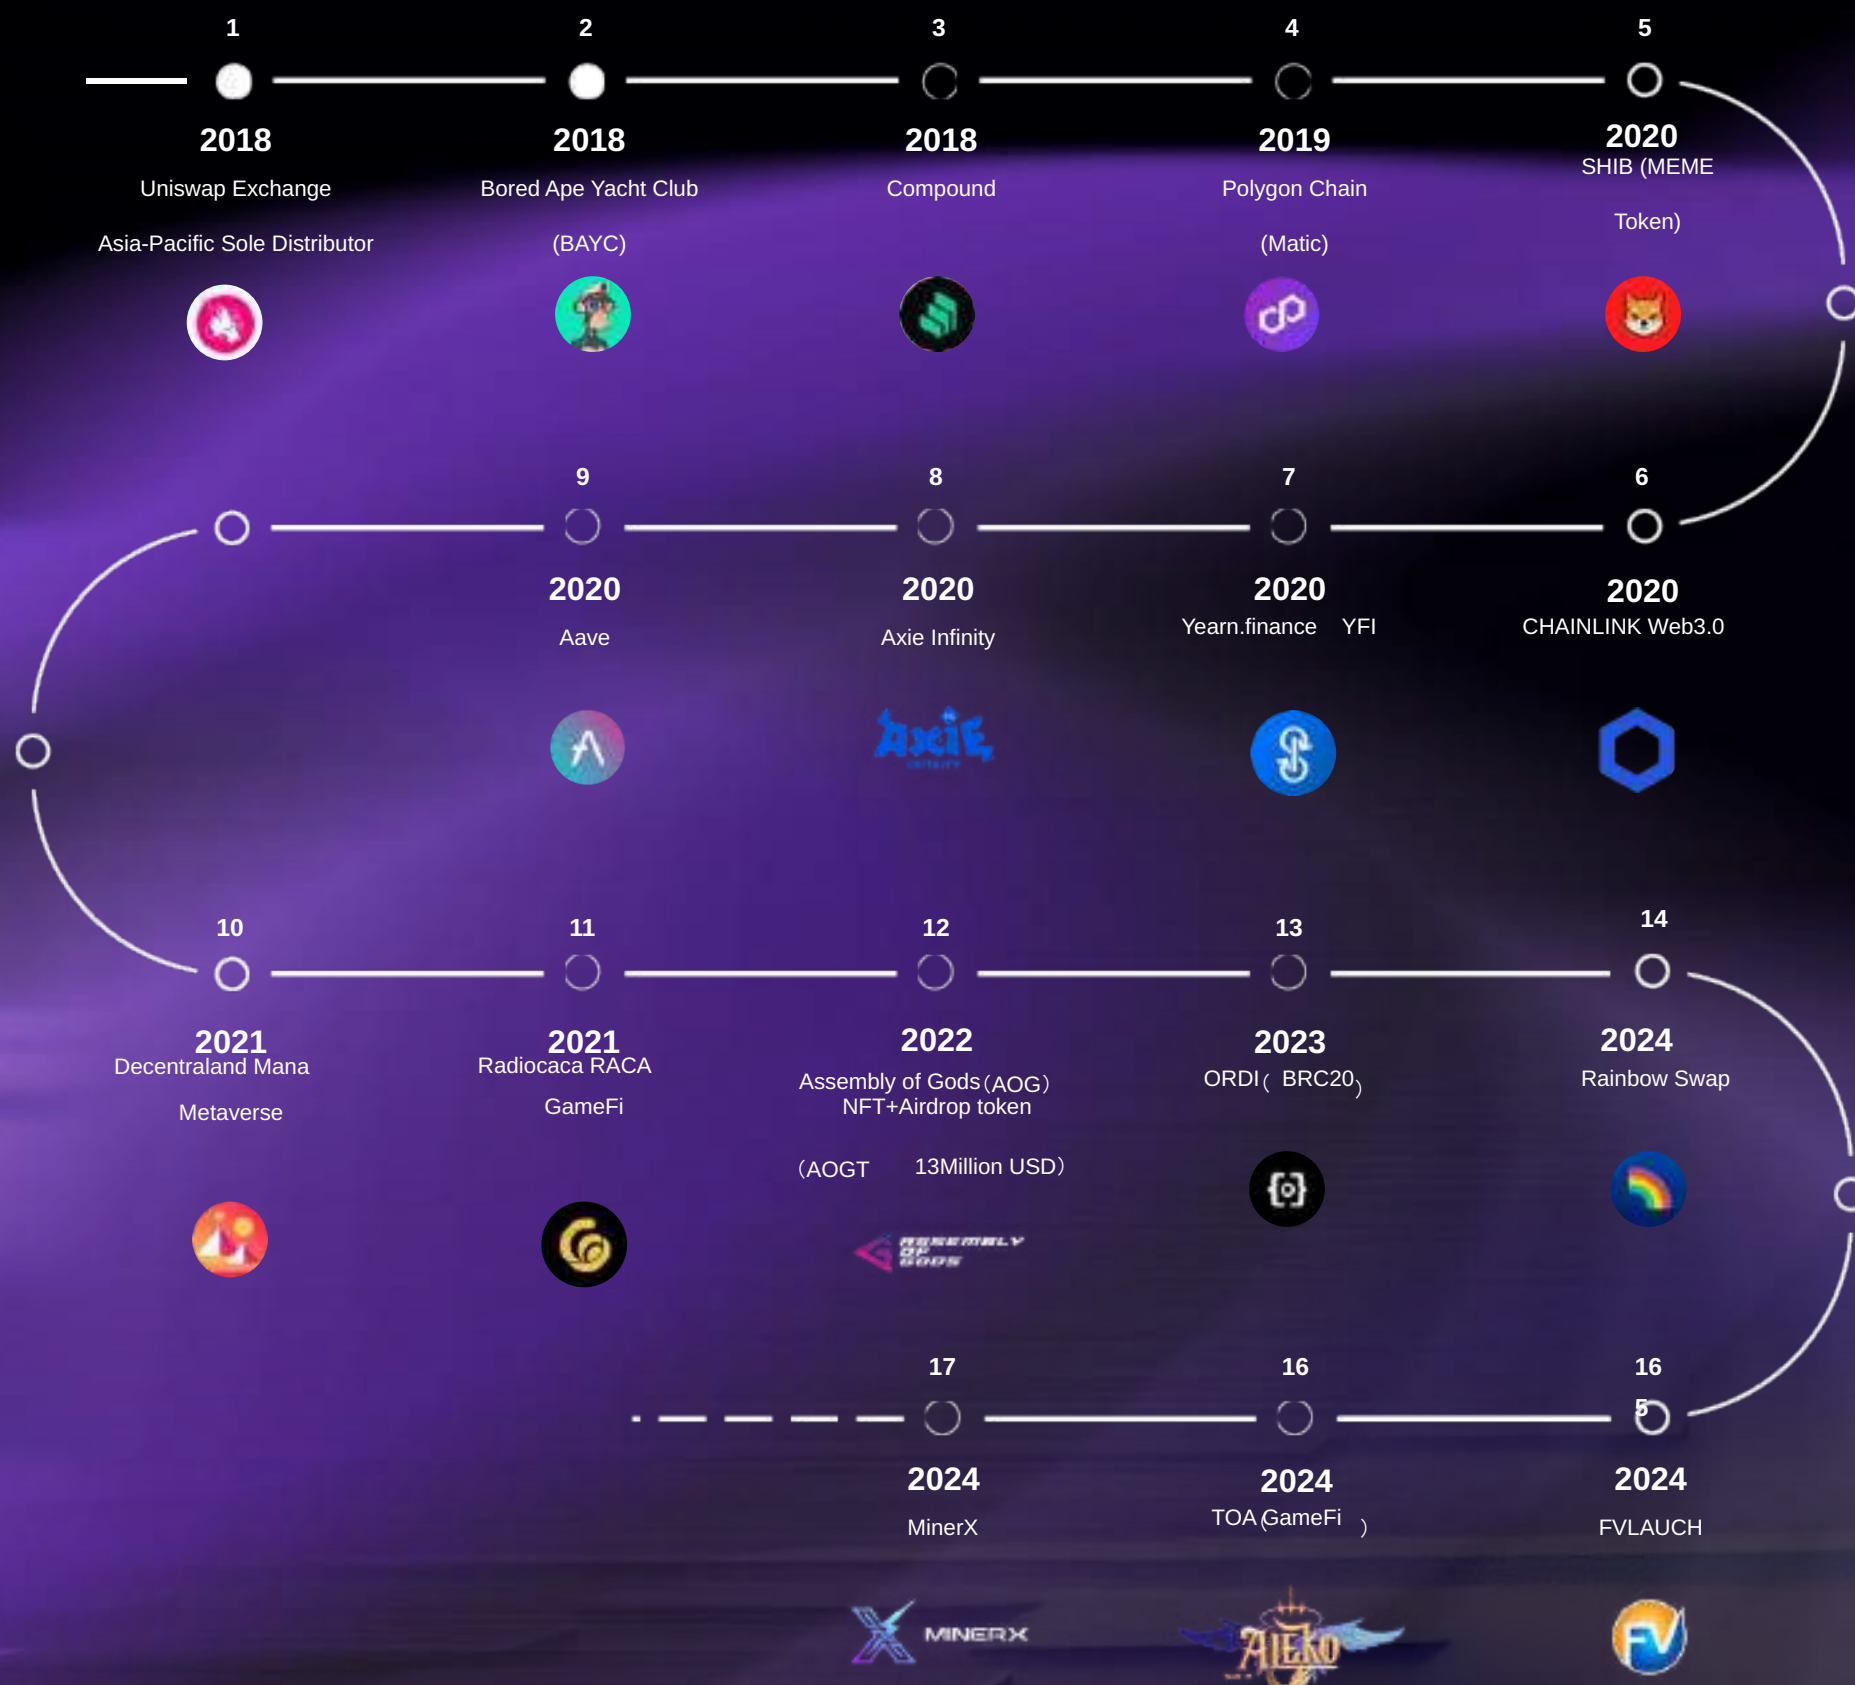

# Simon Cheung

**Global Marketing Director Of Right Arms Project 3.0**

- 20+ Years in the Industry, with a Proven Track Record.
- Built a Successful Offline Network of 80,000+ Members.
- Awarded the Outstanding Business Leader Award by the Direct Selling Association of Malaysia (DSAM).
- Bitcoin Investor since 2014
- Helped Lead an Ethereum-based Project to Achieve over \$10+ Million USD in Earnings, since 2018.

# Right Arms Project 3.0 Success Roadmap

- Since 2018, Right Arms Project 3.0 has Successfully Led Innovation within the Web 3.0 Space, including GameFi, NFTs & more
- Right Arms' Initiatives Span across DeFi, The Metaverse, GameFi, Cryptocurrencies & Decentralized Exchanges
- This Track Record Showcases Right Arms' Strong Global Influence and Forward-Thinking Investor Community Culture

# Technology vs. Vision

Collaboration with World-Renowned Communities

In 2022, the **RightArms 3.0** gaming guild helped the **AOG ecosystem** sell **11,300 NFTs**, with total sales reaching **\$130 million**. Building on this success, **RightArms 3.0** will assist MinerX in its first round of financing, with **AOG** expected to invest **\$10 million**. They will also **share global top-tier community** resources to support the growth of **MinerX**.

**Technology**

**Vision**

**Miner X: A Multi-Million Dollar Investment** Miner X has developed a state-of-the-art Bitcoin accelerator data hub, located in the government-backed Bitcoin Blockchain Center in Phuket, Thailand.

# BTC Mining Accelerator's Quantum Technology

Starting with Cutting-Edge Technology, we Enable Everyone to Enjoy the Continuous Output of Bitcoin, at the Lowest Cost Possible

## Competitive Edge: Advanced Technology

Boost global mining farms' efficiency while reducing costs.

## Increased Productivity

Optimize algorithms to accelerate mining and increase Bitcoin yield.

## Profit Sharing

Share additional profits with mining farms, creating sustainable growth.

# Your Wallet's On-Chain Results

Users purchase devices and automatically delegate them to partnered mining farms on the platform.

Bitcoin transactions are traceable, and the acquired Bitcoin can be freely traded.

# Simply Rent. No Purchase Required.

## Traditional Mining

Traditional miners need substantial investments to set up mining machines and compete with global mining farms.

Tradition

MINERX

## MinerX

Avoid buying expensive mining machines or other hardware. The Community does not bear the risk of machine maintenance or the hardware becoming obsolete, with technological advancements.

# Powerful Addition: Quantum Bit Technology

Quantum Bits (Qubits): Utilize qubits as the fundamental computation unit, based on the principle of quantum superposition, allowing multiple operations to be stored and processed simultaneously in different states.

## Quantum Bit Computation Unit

Handling 4 binary states:  
- 01 - 00 - 11 - 10

7 Times Storage and Computation Efficiency

01100010101010  
00101000111010  
11010100101000  
10011001001100

**MINERX**

## Traditional Computation Unit

Handling 1 binary state:  
- 01

Limited Storage and Computation Efficiency

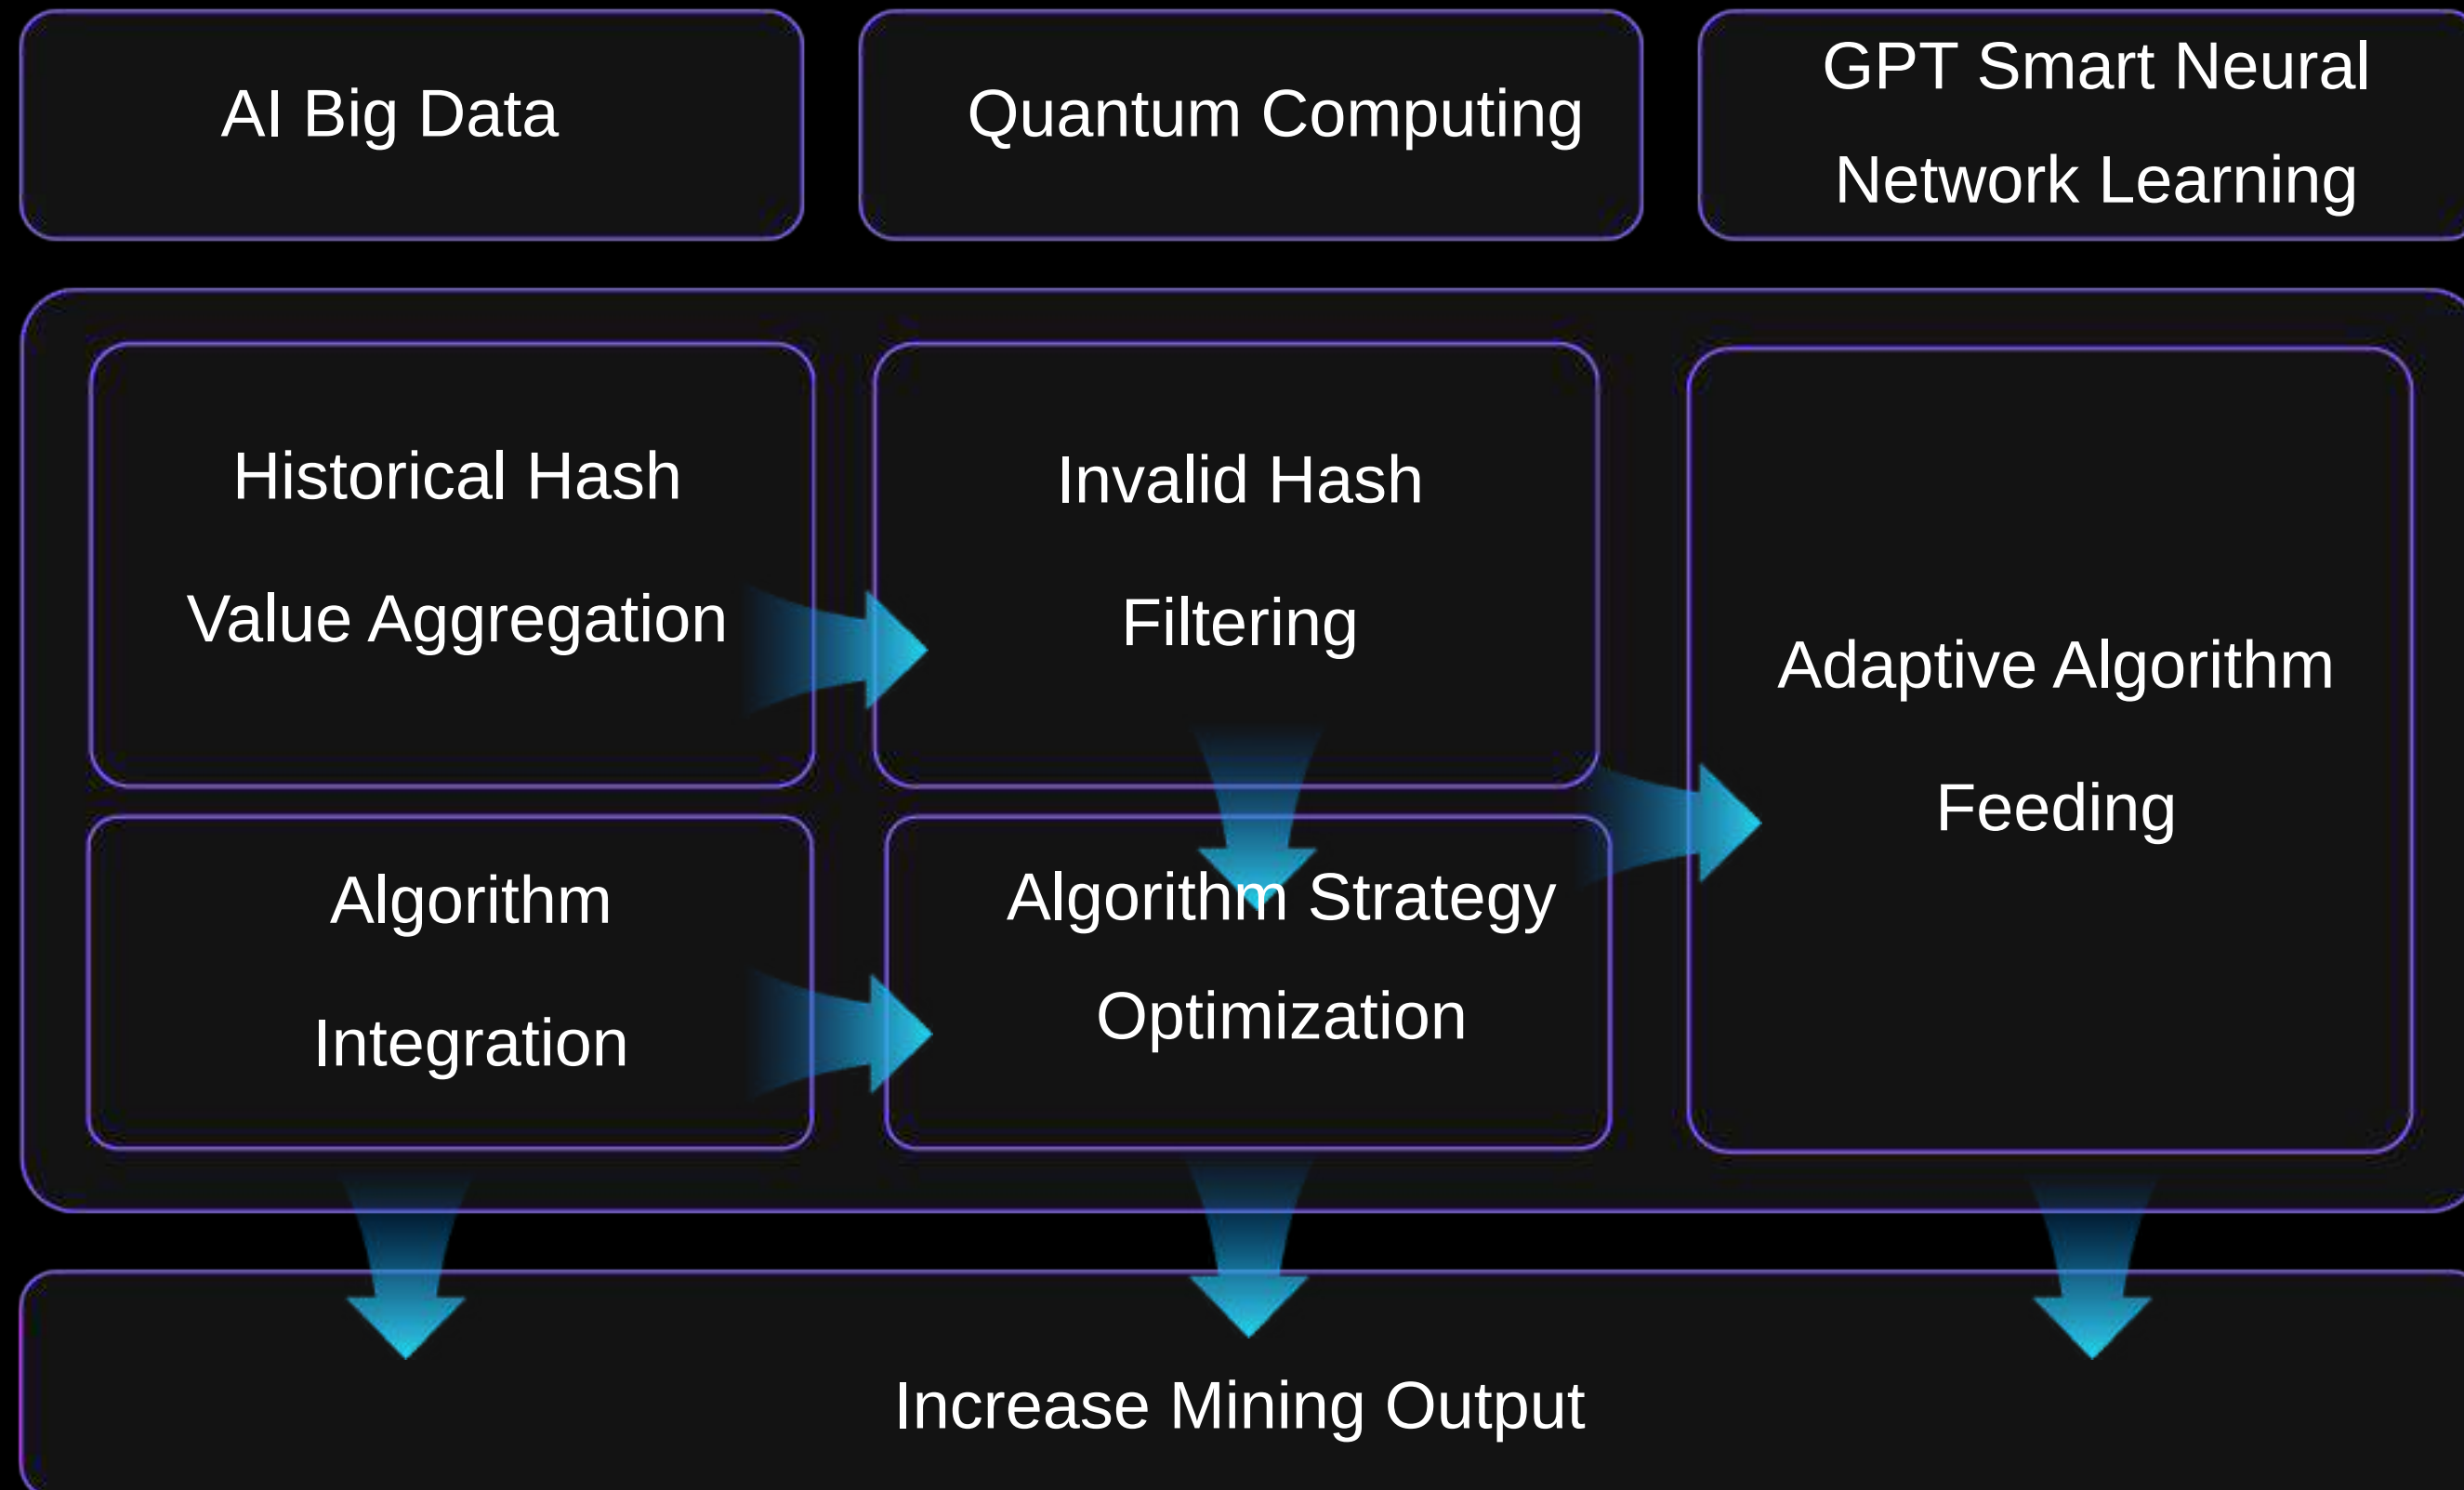

01100010101010

# Significantly Enhances Computational Efficiency

Actual output can be effectively increased by 10-30%

# Two Major Application Directions

**Supported Cryptocurrencies:** BTC, ETC, LTC, BCH, XMR, DASH, and other POW (Proof of Work) based digital currencies

## Accelerating Mining Output

- Utilizes quantum superposition to store and process data in multiple states, simultaneously.
- Combined with AI-driven big data applications, this approach filters and optimizes hash data, significantly boosting mining output.

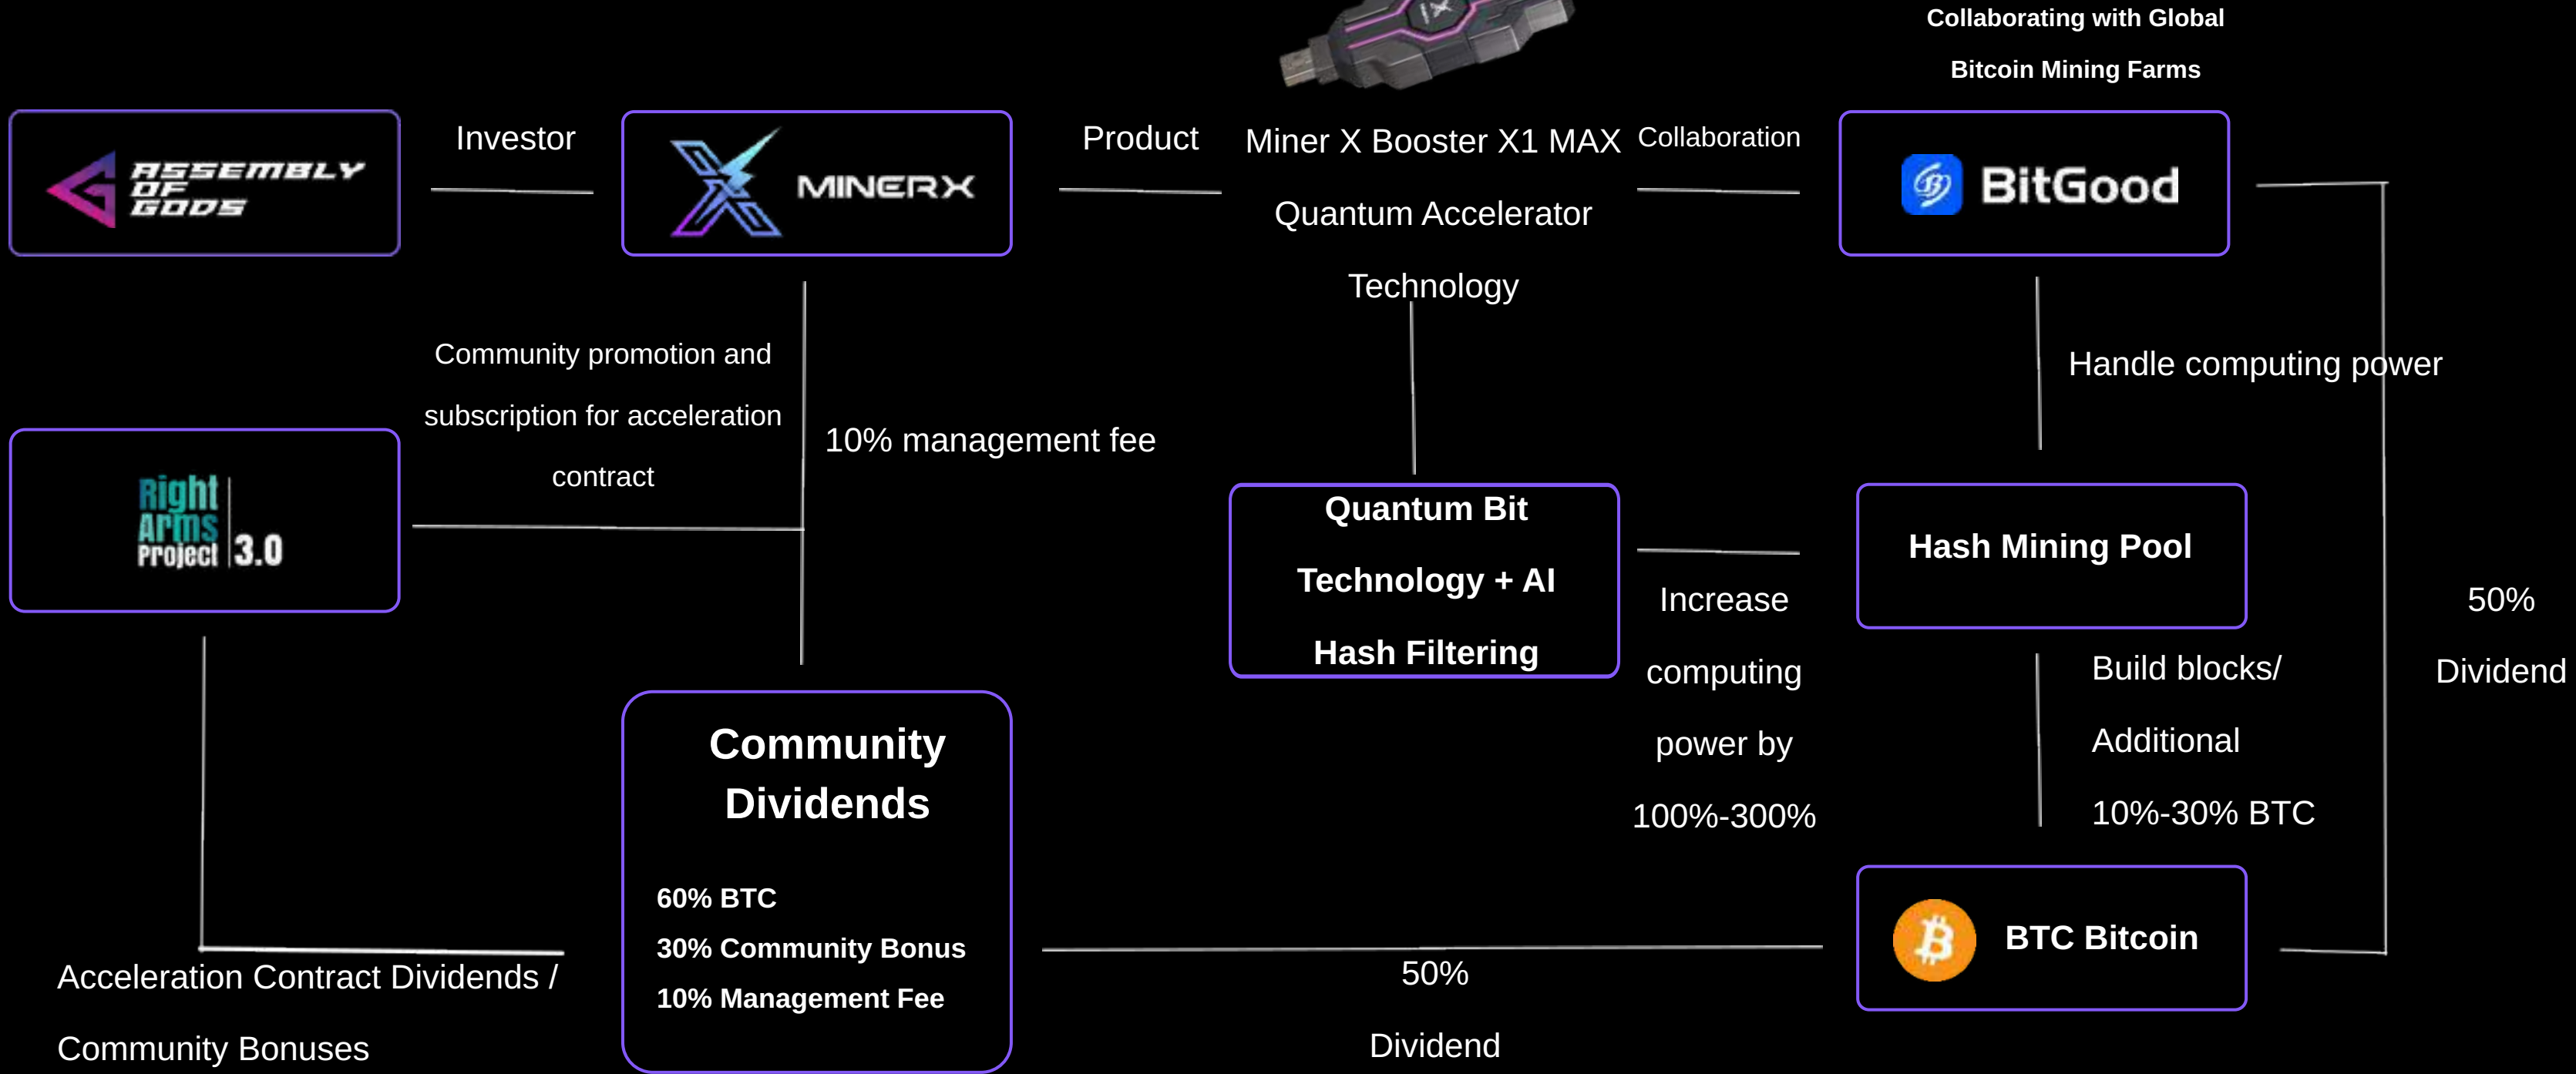

## Mining Farms Collaboration

- Partner with mining farms, of all sizes, worldwide
- This collaboration enhances efficiency for large farms and allows smaller, less advanced farms to generate returns without upgrading hardware.
- Operating globally, managing a vast number of mining machines, without building its own farms.
- Earning a 10% dividend from mining output, as a technology service fee, create a 'win-win' scenario for all participants.
